Kantech KT-1 One-Door Controller

Ethernet / PoE one-door IP access controller · standalone or EntraPass

STOCK CODE

39KT-1-EU-MET-POE

Single-door access control that runs off one network cable — set up in a web browser, or grow it into a full EntraPass system.

1	PoE	32	AES
door (IN/OUT)	powered by LAN	controllers per head	128-bit secure

BEST FOR

- ✔ Single door: office, server room, store room
- ✔ Sites with network cabling but no mains at the door
- ✔ Small businesses wanting browser-based setup
- ✔ Starting small and expanding to EntraPass later
- ✔ Linking access with an intruder alarm panel

NOT FOR

- ✖ Large multi-door sites from day one (use KT-400)
- ✖ Sites without an Ethernet network
- ✖ Customers wanting a keypad-only lock

COUNTER QUICK ANSWERS

Need a PC? No — standalone mode runs in any browser, including phones.

Which readers? Kantech ioSmart readers for full end-to-end encryption.

PoE switch needed? Yes, or a PoE injector/midspan.

WHY CUSTOMERS CHOOSE IT

- **Standalone mode** — set up in a web browser, no software licence
- **EntraPass mode** — one KT-1 can head up 31 more controllers
- **PoE / PoE+** — one cable for power and data
- One-touch enrolment button, plug & play
- Arm/disarm intruder panels from the access system
